ANNUAL STATEMENT FOR THE YEAR 2019 OF THE Harmony Health Plan, Inc.
NOTES TO FINANCIAL STATEMENT

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Harmony Health Plan, Inc. (the “Company”), domiciled in the state of Illinois, are presented on the basis of accounting practices prescribed or permitted by the Insurance Department of Illinois (the “Department”).

The Department recognizes only statutory accounting practices prescribed or permitted by the state of Illinois for determining and reporting the financial condition, results of operations, and cash flows of an insurance company for determining its solvency under Illinois insurance law. The National Association of Insurance Commissioners’ (“NAIC”) Accounting Practices and Procedures manual, (“NAIC SAP”) has been adopted as a component of prescribed or permitted practices by the state of Illinois.

A reconciliation of the Company’s net income (loss) and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Illinois is shown below:

B. Uses of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in accordance with statutory accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The primary use of estimates are related to the Company’s reserve for claims unpaid. Actual results could differ significantly from those estimates.

C. Accounting Policy

Net Premium Income

The Company earns net premium income through participation in Medicaid, Medicaid-related and Medicare programs, including both the Medicare Advantage (“MA”) and the Medicare Part D prescription drug program (“PDP”). Medicaid contracts with state agencies generally are multi-year contracts subject to annual renewal provisions, while Medicare contracts with the Center for Medicare and Medicaid Services (“CMS”) renew annually. Medicare and Medicaid contracts establish fixed, monthly premium rates per member, which are generally determined at the beginning of each new contract renewal period; however, premiums may be adjusted by CMS and state agencies throughout the terms of the contracts in certain cases. Premium rate changes are recognized in the period the change becomes effective, when the effect of the change in the rate is reasonably estimable, and collection is assured.

Medicare Risk-Adjusted Premiums

CMS provides risk-adjusted payments for MA Plans and PDPs based on the demographics and health severity of enrollees. The risk-adjusted premiums received are based on claims and encounter data submitted to CMS within prescribed deadlines. Estimates for risk-adjusted premiums are developed utilizing historical experience, or other data, and predictive models as sufficient member risk score data becomes available over the course of each CMS plan year. Periodic changes to risk-adjusted premiums are recognized as net premium income when the amounts are determinable and collection is reasonably assured, which is possible as additional diagnosis code information is reported to CMS, when the ultimate adjustment settlements are received from CMS, or we receive notification of such settlement amounts. CMS adjusts premiums on two separate occasions on a retrospective basis.

ANNUAL STATEMENT FOR THE YEAR 2019 OF THE Harmony Health Plan, Inc.
NOTES TO FINANCIAL STATEMENT

The first retrospective adjustment for a given plan year generally occurs during the third quarter of that year. This initial settlement represents the update of risk scores for the current plan year based on the severity of claims incurred in the prior plan year. CMS then issues a final retrospective risk adjusted premium settlement for that plan year in the following year. Historically, there have not been significant differences between estimates and amounts ultimately received. The data provided to CMS to determine members' risk scores is subject to audit by CMS even after the annual settlements occur. An audit may result in the refund of premiums to CMS. While experience to date has not resulted in a material refund, future refunds could materially reduce premium net premium income in the year in which CMS determines a refund is required and could be material to our financial statements.

Risk Corridor Provisions

MA and PDP premiums are subject to risk sharing through the CMS Medicare Part D risk corridor provisions. The risk corridor calculation compares actual experience to the target amount of prescription drug costs, limited to costs under the standard coverage as defined by CMS, less rebates included in the submitted plan year bid. The Company receives additional premium from CMS if actual experience is more than 5% above the target amount. The Company refunds premiums to CMS if actual experience is more than 5% below the target amount. Based on the risk corridor provision and PDP activity-to-date, an estimated risk-sharing receivable or payable is recorded as an adjustment to net premium income. After the close of the annual plan year, CMS performs the risk corridor calculation and any differences are settled between CMS and the Company. Historically, there have not been material differences between recorded estimates and the subsequent CMS settlement amounts.

Medicare Part D Settlements

The Company receives certain Part D prospective subsidy payments from CMS for MA and PDP members as a fixed monthly per member amount, based on the estimated costs of providing prescription drug benefits over the plan year, as reflected in bids. Approximately nine to ten months subsequent to the end of the plan year, or later in the case of the coverage gap discount subsidy, a settlement payment is made between CMS and the Company based on the difference between the prospective payments and actual claims experience. The subsidy components under Part D are described below:

Low-Income Cost Sharing Subsidy ("LICS") - For qualifying low-income subsidy members, CMS reimburses the Company for all or a portion of the low income subsidy member's deductible, coinsurance and co-payment amounts above the out-of-pocket threshold.

Catastrophic Reinsurance Subsidy - CMS reimburses the Company for 80% of the drug costs after a member reaches his or her out-of-pocket catastrophic threshold through a catastrophic reinsurance subsidy.

Coverage Gap Discount Subsidy ("CGDS") - CMS provides monthly prospective payments for pharmaceutical manufacturer discounts made available to members.

Catastrophic reinsurance subsidies and LICS subsidies represent cost reimbursements under the Medicare Part D program. The Company is fully reimbursed by CMS for costs incurred for these contract elements and, accordingly, there is no insurance risk to the Company. Therefore, amounts received for these subsidies are not considered net premium income, and are reported, net of the subsidy benefits paid, as deposits. Costs incurred over deposits received are recorded as a receivable for amounts paid for uninsured plans and deposits received in excess of costs incurred are recorded as liability for amounts held under uninsured plans. Historically, the settlement payments between the Company and CMS have not been materially different from our estimates.

CGDS advance payments are recorded as a receivable for amounts paid for uninsured plans. Receivables are set up for manufacturer-invoiced amounts. Manufacturer payments reduce the receivable as payments are received. After the end of the contract year, during the Medicare Part D Payment reconciliation process for the CGDS, CMS will perform a cost-based reconciliation to ensure the Medicare Part D sponsor is paid for gap discounts advanced at the point of sale, based on accepted prescription drug event data.

Medicare Minimum Medical Loss Ratio ("MLR")

Beginning in 2014, the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (collectively, the "ACA"), requires the establishment of a minimum MLR for MA and PDP plans, requiring them to spend not less than 85% of premiums on medical benefits. The rules implementing the minimum MLR impose financial and other penalties for failing to achieve the minimum MLR, including requirements to refund to CMS shortfalls in amounts spent on medical benefits and termination of a plan's MA contract for prolonged failure to achieve the minimum MLR. Minimum MLR is determined by adding a plan's spending for clinical services, prescription drugs and other direct patient benefits, plus its total spending on quality improvement activities and dividing the total by earned premiums (after subtracting specific identified taxes and other fees). No premium refund was due or accrued for the Calendar Year 2019 or 2018 plan periods associated with these contract provisions. At December 31, 2019 and 2018, the Company had a payable of \$0 and \$18,721,014, to CMS for minimum MLR, respectively.

Medicaid Minimum Medical Loss Ratio ("minimum MLR provision")

The Company's Medicaid contract with Illinois Department of Health and Family Services ("IDHFS") includes a provision whereby the Company is required to expend a minimum of 85% of the premiums received related to allowable medical benefits expense, as defined in the contract ("minimum MLR provision"). To the extent that the Company expends less than the minimum percentage of the premiums, offset by allowable taxes and assessments, on allowable medical benefits expense, including allowable quality improvement expenses, in any contract year as required by the minimum MLR provision, the Company is required to refund to IDHFS all of the difference between the minimum and our actual allowable medical benefits expense. The Company performs a calculation of the minimum MLR provision each reporting period and accrues an estimate for amounts to be refunded based on its current estimates

of ultimate loss experience for the contract period. The Company has payables of \$3,310,888 and \$5,010,888, due to IDHFS as of December 31, 2019 and 2018, respectively.

1. *Short-term investments* - Short-term investments are stated at amortized cost.
2. *Bonds* - Bonds not backed by other loans are stated at amortized cost using the scientific/constant yield method of amortization (accretion) of discounts or premiums.
3. *Common Stocks* - The Company had no common stocks.
4. *Preferred Stocks* - The Company had no preferred stocks.

8. *Investments in Joint Ventures, Partnerships and Limited Liability Companies("LLC")* - The Company had no investments in joint ventures, partnerships and LLC.
9. *Derivatives* - The Company had no derivatives.
10. *Premium Deficiency ("PDR")* - the Company's contracts are evaluated to determine if it is probable that a loss will be incurred. A PDR is established when it is probable that expected claims payments or incurred costs, claims adjustment expenses, and general administration expenses will exceed future premiums and reinsurance recoveries for the remainder of a contract period. For purposes of determining a PDR, investment income is excluded and contracts are grouped in a manner consistent with the method of acquiring, servicing and measuring the profitability of such contracts. A PDR is recorded as an aggregate health policy reserves and as an increase in reserves for life and accident and health contracts. Once established, a PDR is reduced over the contract period as an offset to actual losses. The PDR estimates are re-evaluated each reporting period and, if estimated future losses differ from those in the current PDR estimate, the liability is adjusted through increase in reserves for life and accident and health contracts, as necessary. The Company had no PDR liability recorded within its liabilities as of December 31, 2019 and 2018.
11. *Unpaid Losses and Loss Adjustment Expenses* - The Company recognizes the cost of medical benefits in the period in which services are provided, including an estimate of the cost of medical benefits incurred but not reported ("IBNR"). Medical benefits incurred and claims adjustment expenses include claim payments, capitation payments, pharmacy costs net of rebates, allocations of certain centralized expenses, legal and administrative costs to settle claims, and various other costs incurred to provide health insurance coverage to members.

The Company also records direct medical expenses for estimated referral claims related to health care providers under contract with the Company who are financially troubled or insolvent and who may not be able to honor their obligations for the costs of medical services provided by others. In these instances, the Company may be required to honor these obligations for legal or business reasons. Based on the current assessment of providers under contract with the Company, such losses have not been and are not expected to be significant. The Company records direct medical expense for estimates of provider settlements due to clarification of contract terms, out-of-network reimbursement, claims payment differences and amounts due to contracted providers under risk-sharing arrangements.

Claims unpaid represents amounts for claims fully adjudicated but not yet paid and estimates for IBNR. The Company's estimate of IBNR is the most significant estimate included in the financial statements. The Company determines the best estimate of the base liability for IBNR utilizing consistent standard actuarial methodologies based upon key assumptions which vary by business segment. The assumptions include current payment experience, trend factors, and completion factors. Trend factors in standard actuarial methodologies include contractual requirements, historic utilization trends, the interval between the date services are rendered and the date claims are paid, denied claims activity, disputed claims activity, benefit changes, expected health care cost inflation, seasonality patterns, maturity of lines of business, changes in membership and other factors.

After determining an estimate of the base liability for IBNR, the Company makes an additional estimate, also using standard actuarial techniques, to account for adverse conditions that may cause actual claims to be higher than the estimated base reserve. This additional liability is referred to as the provision for moderately adverse conditions. The estimate of the provision for moderately adverse conditions captures the potential adverse development from factors such as:

- entry into new geographical markets;
- provision of services to new populations such as the aged, blind and disabled;
- variations in utilization of benefits and increasing medical costs, including higher drug costs;
- changes in provider reimbursement arrangements;
- variations in claims processing speed and patterns, claims payment and the severity of claims; and

- health epidemics or outbreaks of disease such as the flu or enterovirus.

The Company evaluates estimates of medical benefits payable claims unpaid as it obtains more complete claims information and medical expense trend data over time. The Company records differences between actual experience and estimates used to establish the liability, which is referred to as favorable and unfavorable prior period developments, as increases or decreases to medical benefits hospital and medical expense in the period the Company identifies the differences.

12. *Capitalization Policy* - The Company did not modify its capitalization policy from the prior period.

13. *Pharmacy Rebates* - Pharmacy rebates are recorded on an accrual basis and are estimated based on invoices that have been prepared using actual prescriptions filled, historical utilization of specific pharmaceuticals and contract terms and records such amounts as a reduction of total hospital and medical cost.

22. Events Subsequent

ACA Annual Fee

The Company is subject to the annual industry fee under section 9010 of ACA. The industry fee is being levied on certain health insurers that provide insurance in the assessment year, and is allocated to health insurers based on each health insurer's share of net premiums for all U.S health insurers in the year preceding the assessment. In December 2015, President Obama signed the Consolidated Appropriations Act, 2016 which, among other provisions, included a one-year moratorium on the ACA industry fee for 2017 (payable in 2018). Additionally, in January 2018, Congress approved an additional one-year moratorium of the ACA industry fee for 2019 (payable in 2020). The 116th Congress passed a permanent repeal of the ACA industry fee starting in 2021 and repealed the other two ACA taxes, Medical Device Tax and Excise Tax, immediately.

The liability and expense are recognized once the Company provides health insurance for any U.S. health risk in the assessment year. The Company paid and expensed \$0 and \$22,981,378 in 2019 and 2018, respectively. Additionally, the estimate for the following year's fee is accrued monthly and separately segregated within surplus as an aggregate write-in in accordance with Statutory accounting guidance.

The Company has an agreement with its state Medicaid customer in Illinois which provides for them to reimburse the Company for the portion of the ACA industry fee attributable to the Medicaid program in the state, including its non-deductibility for income tax purposes. The execution of the agreement enabled the Company to recognize approximately \$0 and \$9,499,647 reimbursement as premium revenue for the years ending December 31, 2019 and 2018, respectively.
