Note 1 - Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Arkansas Blue Cross and Blue Shield are presented on the basis of accounting practices prescribed or permitted by the Arkansas Insurance Department.

The Arkansas Insurance Department recognizes only statutory accounting practices prescribed or permitted by the State of Arkansas for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under Arkansas Law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures* manual, version effective January 1, 2001, (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the Arkansas Insurance Department.

B. Use of Estimates in the Preparation of the Financial Statement

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or polices. Expenses incurred in connection with acquiring new insurance business are charged to operations as incurred.

In addition, the company uses the following accounting policies:

- (1) Basis for Short-Term Investments
 - Short-term investments are stated at amortized cost.
- (2) Basis for Bonds, Mandatory Convertible Securities, SVO-Identified Investments and Amortization Method Bonds not backed by other loans and are stated at amortized cost using the interest method.
- (3) Basis for Common Stocks
 - Common Stocks are carried at market except that investments in stocks of uncombined subsidiaries and affiliates in which the Company has an interest of 20% or more are carried on the equity basis.
- (4) Basis for Preferred Stocks
 - The Company does not have preferred stock.
- (5) Basis for Mortgage Loans
 - The Company does not have mortgage loans. The Company does own mortgage backed securities.
- (6) Basis for Loan-Backed Securities and Adjustment Methodology
 - Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair value. The prospective adjustment method is used to value all securities.
- (7) Accounting Policies for Investments in Subsidiaries, Controlled and Affiliated Entities
 - Common stock investments in affiliates including limited liability companies are carried at their NAIC SAP or GAAP equity values in accordance with the requirements of SSAP no. 97, *Investments in Subsidiary, Controlled, and Affiliated Entities*.
- (8) Accounting Policies for Investments in Joint Ventures, Partnerships and Limited Liability Entities
 - The Company has investments in joint ventures, partnerships and limited liability companies. See (7) above for accounting policy
- (9) Accounting Policies for Derivatives
 - The Company does not have derivatives.
- (10) Anticipated Investment Income Used in Premium Deficiency Calculation
 - The Company does not have premium deficiency reserves.
- (11) Management's Policies and Methodologies for Estimating Liabilities for Losses and Loss/Claim Adjustment Expenses
 - When setting reserves, the Company employs the 5 methods that are described below. Based on the estimates of these methods and also retrospective considerations, the company sets a best estimate and then an explicit margin is added to ensure that the estimate is sufficient. The average of the methods, as well as the spread of the estimates, is also considered when setting the respective liabilities. Aggregate liabilities are tested against other aggregate estimation methods to check for reasonableness, and any additional margin or adjustments are made
 - Aggregate Method: 12 months of paid claims are subtracted from 12 months of estimated incurred claims to get the liability estimate
 - b. 3 Month Average Method: For the base liability estimate, the average liability of the third, fourth, and fifth month prior to the current

- month is used. Adjustments are made for trend, membership change, and backlog to determine the current month's estimate of liability.
- c. Previous Year's IBNR Method This method is similar to the Three Month Average Method, except that the actual reserve from one year ago is used as the base estimate of liability. This is projected forward using adjustments for trend, membership change, and backlog.
- d. CY Lag Method: This method calculates completion factors by incurral year. Completion factors used for the current year are based on the previous year's experience. Completion factors for the most recent 3 years are set manually.
 - **e. 12 Month CF Method:** This method is identical to the CY Lag Method, except that historical completion factors are based on 12 months of rolling data.
 - (12) Changes in the Capitalization Policy and Predefined Thresholds from Prior Period No change in the capitalization policy this year.
 - (13) Method Used to Estimate Pharmaceutical Rebate Receivables Pharmacy rebate receivable estimates are based upon the prior quarter's invoiced amounts

D. Going Concern

For the period ending September 30, 2020 management has evaluated the Company's ability to continue as a going concern. Management has concluded that there is not substantial doubt that the Company can continue as a going concern, therefore, there are no policies in place to alleviate such situations.

 - Description of Sources Used to Determine Prepayment Assumptions
 For fixed-rate agency mortgage-backed securities, Clearwater Analytics calculates prepayment speeds utilizing Mortgage Industry Advisory Corporation (MIAC) Mortgage Industry Medians (MIMs). MIMs are derived from a semi-monthly dealer-consensus survey of long-term prepayment projections. For other mortgage-backed, loan-backed, and structured securities, Clearwater utilizes prepayment assumptions from Moody's Analytics. Moody's applies a flat economic credit model and utilizes a vector of multiple monthly speeds as opposed to a single speed for more robust projections. In instances where Moody's projections are not available, Clearwater uses data from Reuters, which utilizes the median prepayment speed from contributors' models.

E. NAV Practical Expedient Investments

1. Martingale Investment Trust – Series 1 Low Volatility Large Cap+

This strategy seeks to meet or exceed equity market returns while realizing significantly less volatility. This investment focuses on identifying and investing in low risk companies with sound fundamental properties. The portfolio is considered to be a low risk portfolio with broad, stable sector diversification. The fund contains 189 individual holdings as of 09/30/2020 with the top 10% of all holdings representing 14.4% of all fund holdings. Overall, the risk target of this portfolio is to perform with 70%-80% of the overall market volatility of the Russell 1000 Index.

The fund is able to be liquidated on a monthly basis. Because the underlying portfolio contains assets that are part of the Russell 1000 Index, it is very probable that the fund would not liquidate at the NAV of a prior month. It is

possible the fund could be liquidated at a higher or lower price depending on overall market actions.

Barings U.S. Loan Fund Series - Tranche A

The Barings investment process is a focused and detailed fundamental bottom-up due diligence. The firm's investment philosophy is based on the belief that long-term, risk-adjusted returns can best be achieved through active portfolio management coupled with strong fundamental credit underwriting with the goal of minimizing principal losses. The firm takes a credit-intensive approach when selecting assets that seeks to determine where favorable value exists within companies on a relative basis to other investment alternatives.

The average number of loans in the portfolio is 193 at the end of the 3rd quarter 2020, with 11.6% in the top ten holdings. The portfolio is diversified across eleven sectors, with three sectors containing more than 10% of all holdings. Average annualized default since 2011 for the fund is 0.7%, while the historical average of the market is 2.9%.

The fund has daily liquidity but a 30 calendar day prior to withdraw notice is necessary. As of 09/30/20, there are \$1.0 Billion assets in the Commingled Fund.

Note 25 - Change in Incurred Losses and Loss Adjustment Expenses

Change in Incurred Losses and Loss Adjustment Expenses

Reserves as of December 31, 2019 were \$190,894,561. As of September 30, 2020, \$187,203,746 has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$15,366,091 as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been a \$19,056,906 favorable prior-year development since December 31, 2019 to September 30, 2020. The increase is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims.
